

Essential Pedestrian with Three Rails

The X-Protect Essential Pedestrian Barrier with Three Rails provides added impact resistance and visibility for safe, well-defined walkways. Ideal for light-duty zones, it enhances separation between people and vehicles while keeping layouts open and efficient.

The Essential Pedestrian Barrier with Three Rails provides an enhanced level of protection for areas where additional height and visibility are required. Designed for light-duty impact zones, it creates safe, well-defined walkways while maintaining an open and efficient layout.

To further improve site safety, the Floor Barrier can be integrated into this configuration. It acts as a solid base element that reinforces the lower section of the system, offering additional protection against ground-level risks such as vehicle forks, pallets and debris. This combination provides a continuous barrier line that enhances both visibility and impact resistance while maintaining smooth traffic flow between zones.

Installation is quick and efficient, with minimal fixings required and no unnecessary stress on the floor surface.

Key features

- Fast to install

- Kind to the floor
- Easy to repair

Impact test results					
Area of impact	Load	Equivalent to		90° Deflection	Force to fixings
Centre of barrier C - C as below					
1500mm	2000 J	2500kg 4.6 km/h	1500kg 5.9 km/h	334mm	4.2kN
2000mm	2250 J	2500kg 4.8 km/h	1500kg 5.9 km/h	414mm	5.1kN
