» X-Guard® Hitch Lock

X-Guard® Hitch Lock

This lock is an alternative to our X-lock and has an integrated mounting for non-contact switches. The lock has an adjustable hitch for eliminating any internal play.

The handle is spring-loaded to remove the ability of the door to automatically fully close. To fully shut the door requires deliberate operation of the handle eliminating accidental closure.

Euro cylinder locking is available as an option. With this variant the key should be carried with the engineer into the cell to prevent accidental closure.

Hitch Lock

- Integrated mounting for non-contact switches
 - Adjustable hitch
 - Cylinder lock are available as an option
