

Axellent Product Information

» Rack End Protector

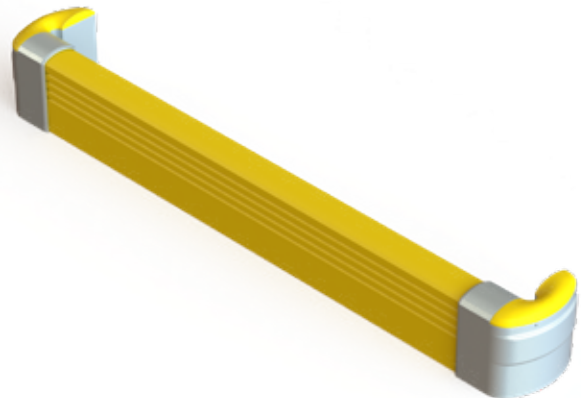

Rack End Protector

With each hit, bump and scuff, our Rack End Protector diffuses impact—stopping forklifts and pallet jacks with a calculated amount of energy absorption.

Sideswipes get steered back on track. We call it a controlled deflection. You'll call it peace of mind.

Rack End Protector

- All-angle Protection - Absorbs direct impacts, deflects glancing blows
- Zero Maintenance - Install it once, get peace of mind for years
- High Visibility - Your best defense is being seen
