X-Guard® Height 2500 mm

X-Guard is a complete machine guard series that complies with the amended Machinery Directive 2006/42/EC on fixed guards that came into force on 29 December 2009. With its wide range of standard components and accessories, X-Guard is guaranteed to cover all possible machine guard needs. X-Guard was launched in 2008 and has since then been complemented with additional sizes.

The panels measuring 2400 mm in height are available in 13 different widths. Posts and panels are not stocked, instead they are made to order. Contact our customer service for information about delivery times. As with the rest of the range, panels and posts are available in RAL 9011 and RAL 1018 as standard but can also be tailored to specific customer needs.

The system with a height of 2500 mm can be combined with most door solutions from the existing X-Guard Classic range.

Height 2500 mm

- 2006/42/EC
 - 13 different mesh panel widths
 - 4 different plastic panel widths
 - Door solutions – see X-Guard Classic range
